

Центр принятия решений на основе WebSphere Operational Decision Management. Индустриальные примеры.

Эдуард Долгалев
Рук. направления WebSphere в России и СНГ
16 февраля 2012

Окружающая среда стала более изменчива

Руководители ожидают, что изменения будут происходить чаще и менее предсказуемо

До какой степени экономическая обстановка отличается?

Процент Топ-менеджеров, кто ответил “*В большой или очень значительной степени*”

Source: IBM CEO Study 2010

Преобразования и рост требуют лучших решений

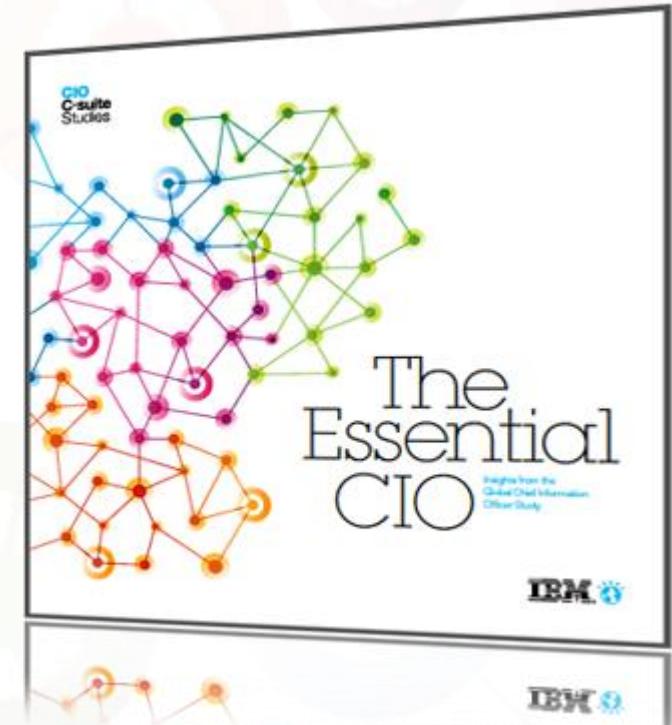

ИТ-директора признают, что автоматизация эффективных решений – ключ к успеху

75%

ИТ-директоров с задачей поддержать преобразования в бизнесе планируют сфокусироваться на “*улучшении принятия решений в реальном времени.*”

72%

ИТ-директоров с задачей увеличить эффективность организации стимулируют *принятие лучших оперативных решений.*”

Source: IBM Global CIO Study 2011

Пример ежедневных оперативных решений

в кредитах

Какой риск у выданного кредита?
Какая применимая ставка для кредита?
Насколько клиент удовлетворяет требованиям сформированного предложения?

в платежах

Какая комиссия для операции?
Как выбрать путь обработки платежа?
Как обработать исключительные ситуации?
Как определить подозрительные операции?

в услугах

Какой продукт рекомендовать?
Как обработать претензии клиента?

в рисках и
регламентах

Как обработать транзакцию?
Как сопоставить и проверить данные из разных источников?
Как расчитать риски?

Большой объем ежедневных решений указывает на возможность **повышения эффективности операционной деятельности**
т.е. быстрее производить изменения в сквозных процессах, сократить время вывода новых услуг/регламентов, гибче подходить созданию персонифицированных предложений, сокращение ошибок

*Представим страховую компанию с
2-мя требованиями нового
проекта:*

1. Расчет предложения через Web-сайт

*Расчет на основе клиентской и накопленной информации и
статистики*

2. Проактивное привлечение клиентов

*Работа с потенциальными клиентами, кто интересовался
несколько раз предложения по разным каналам (web, call
center, office) но пока не стал клиентом*

1. Оперативные решения на основе правил

■ Решения

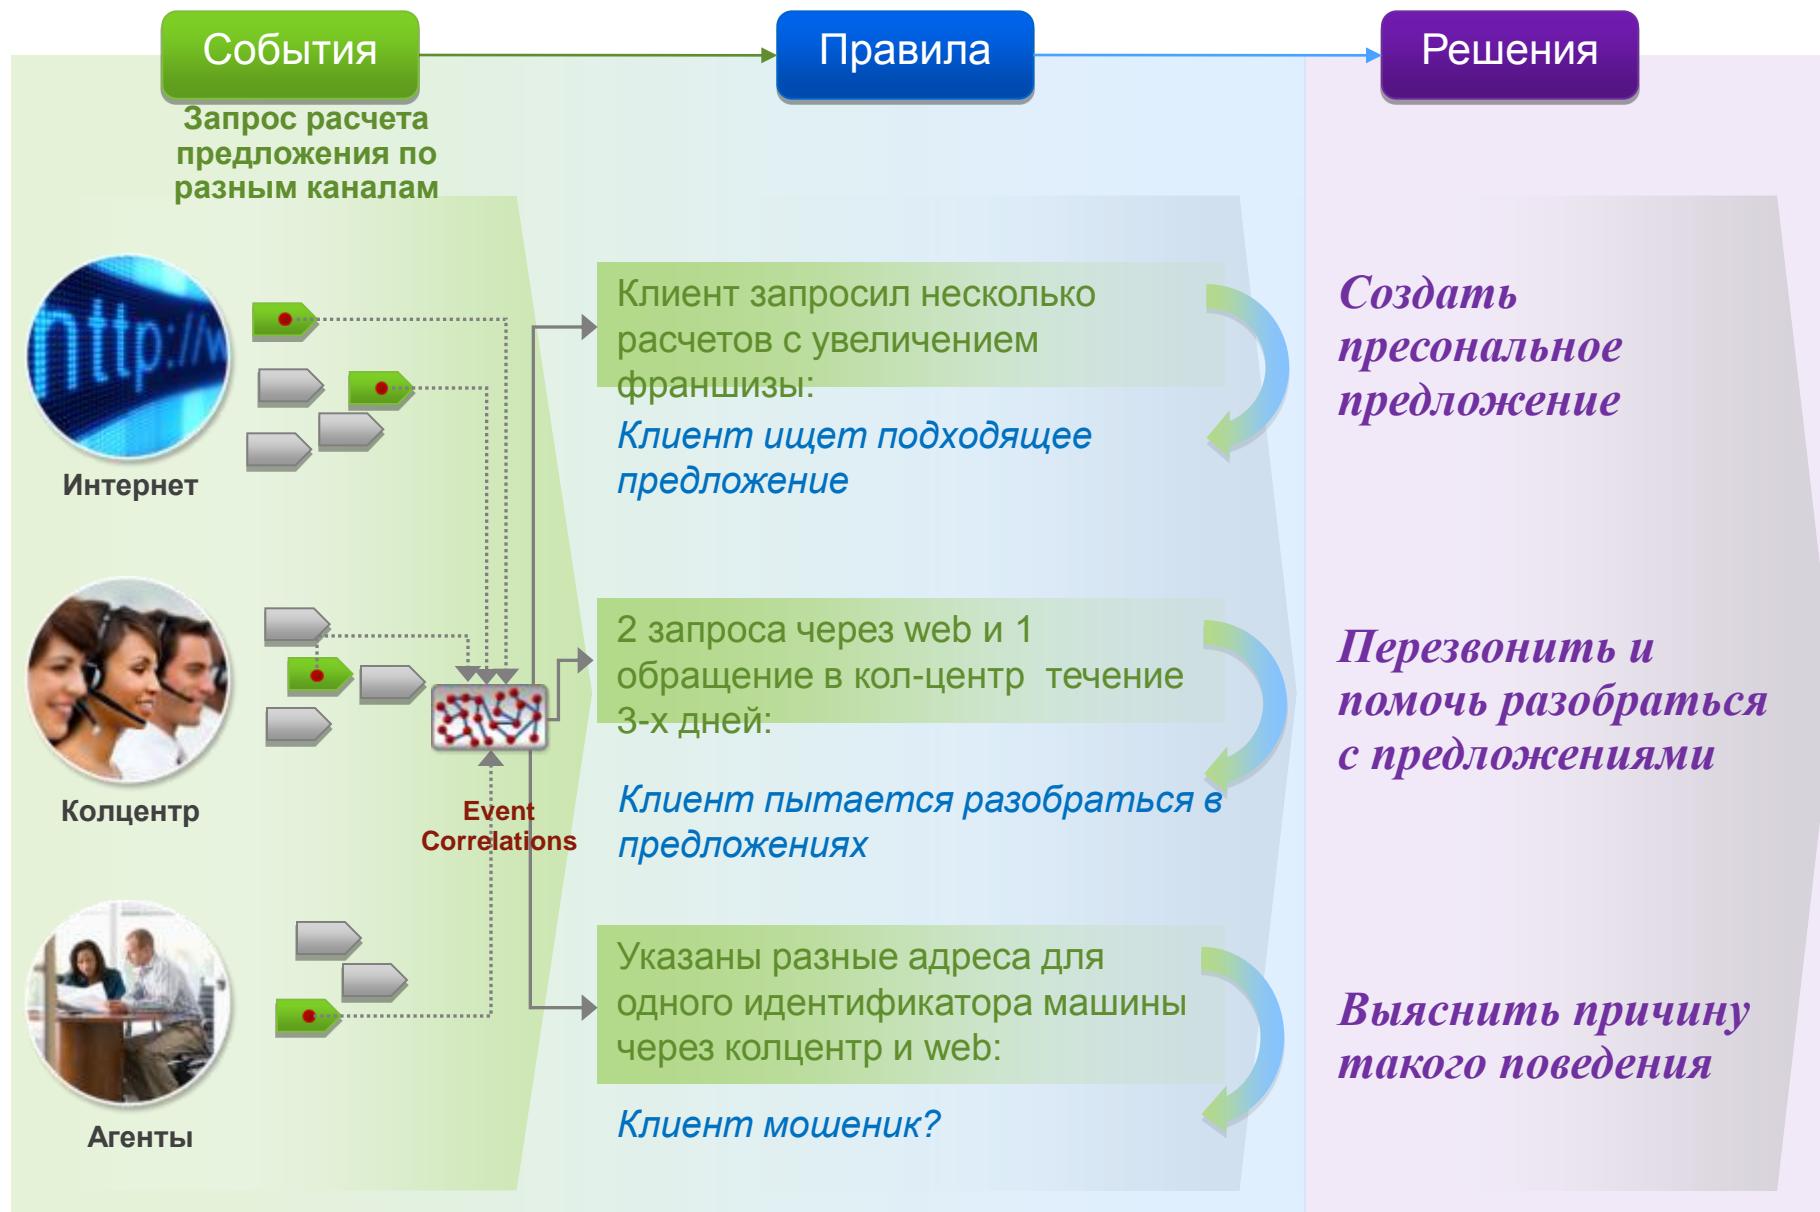

- Отклонить или принять заявку и расчитать квоту

■ Правила

- Валидация данных
- Соответствие регламентам/выявление мошенничества
- Расчет предложения / Промо-акции

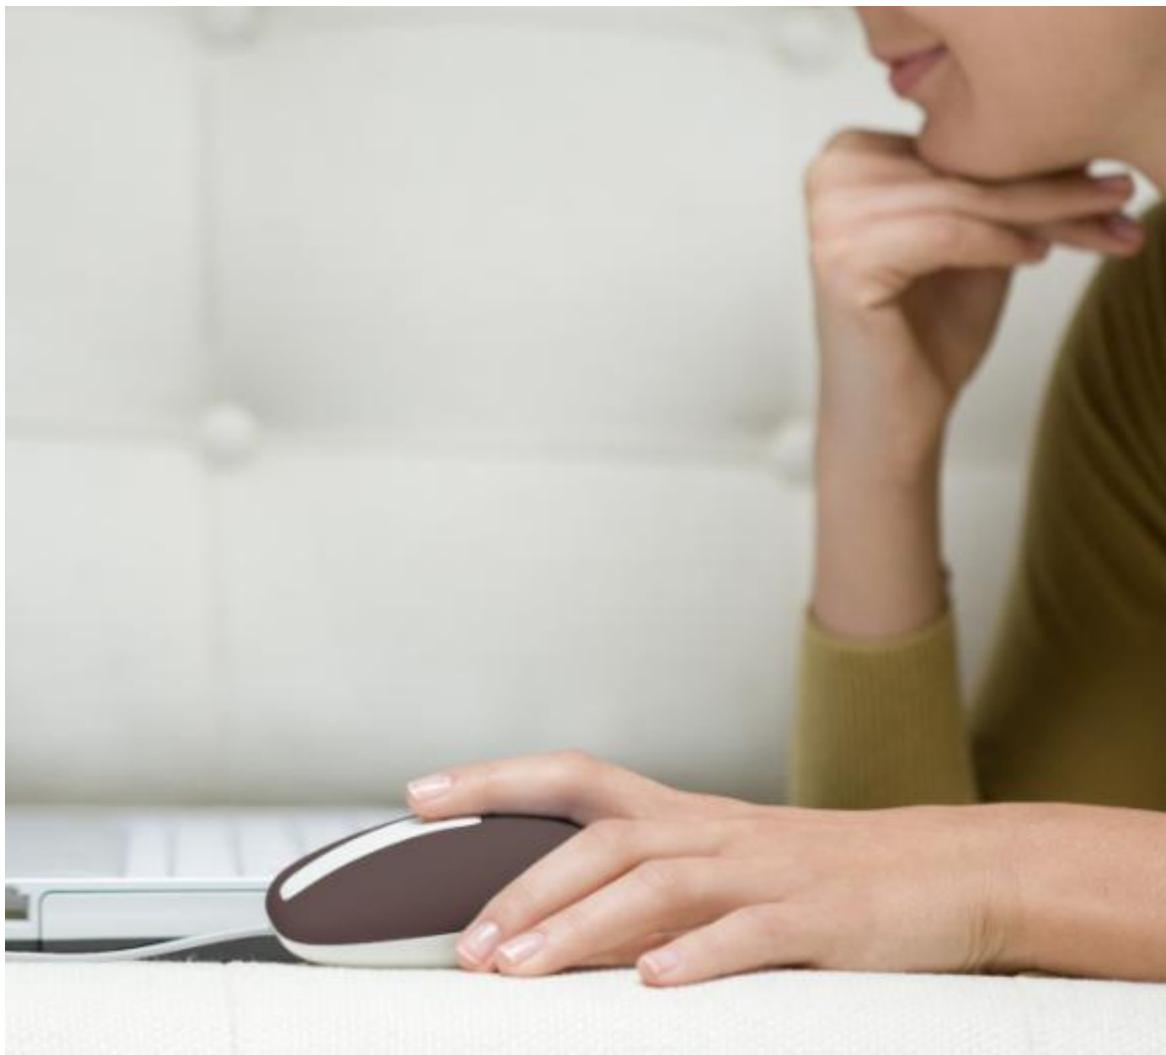

| | Vehicle Value Lower | Upper | Deductible | Base Premium |
|----|------------------------|------------|------------|--------------|
| 1 | \$ 0 | \$ 4,000 | \$250 | \$ 36 |
| 2 | | | \$500 | \$ 33 |
| 3 | | | \$1000 | \$ 23 |
| 4 | | | \$250 | \$ 43 |
| 5 | \$ 4,000 | \$ 10,000 | \$500 | \$ 39 |
| 6 | | | \$1000 | \$ 27 |
| 7 | | | \$250 | \$ 47 |
| 8 | \$ 10,000 | \$ 30,000 | \$500 | \$ 41 |
| 9 | | | \$1000 | \$ 32 |
| 10 | | | \$250 | \$ 52 |
| 11 | \$ 30,000 | \$ 60,000 | \$500 | \$ 49 |
| 12 | | | \$1000 | \$ 40 |
| 13 | | | \$250 | \$ 62 |
| 14 | \$ 60,000 | \$ 100,000 | \$500 | \$ 59 |
| 15 | | | \$1000 | \$ 48 |

2. Оперативные решения на основе событий

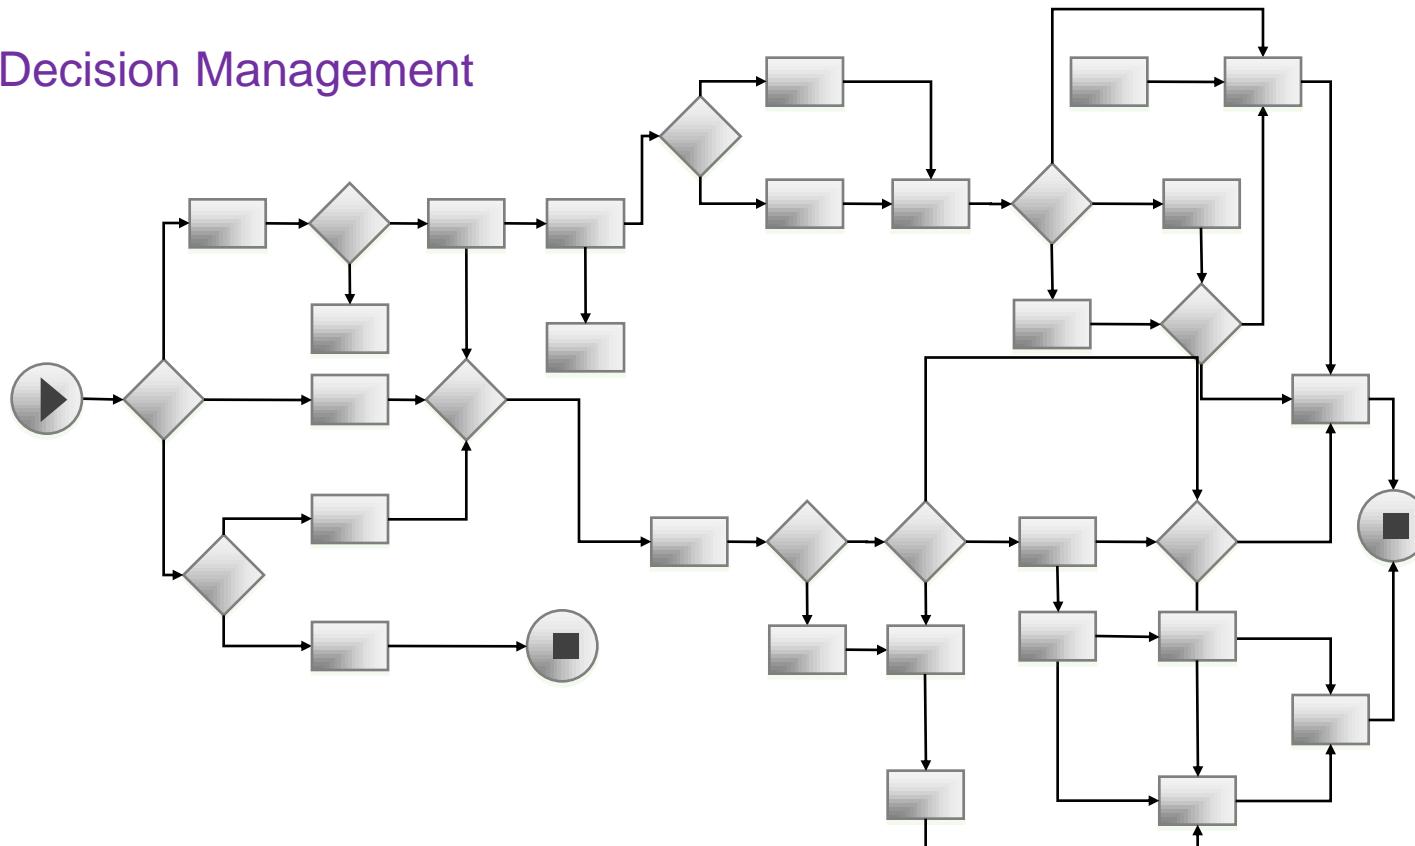

Где еще спрятаны бизнес-решения?

IBM

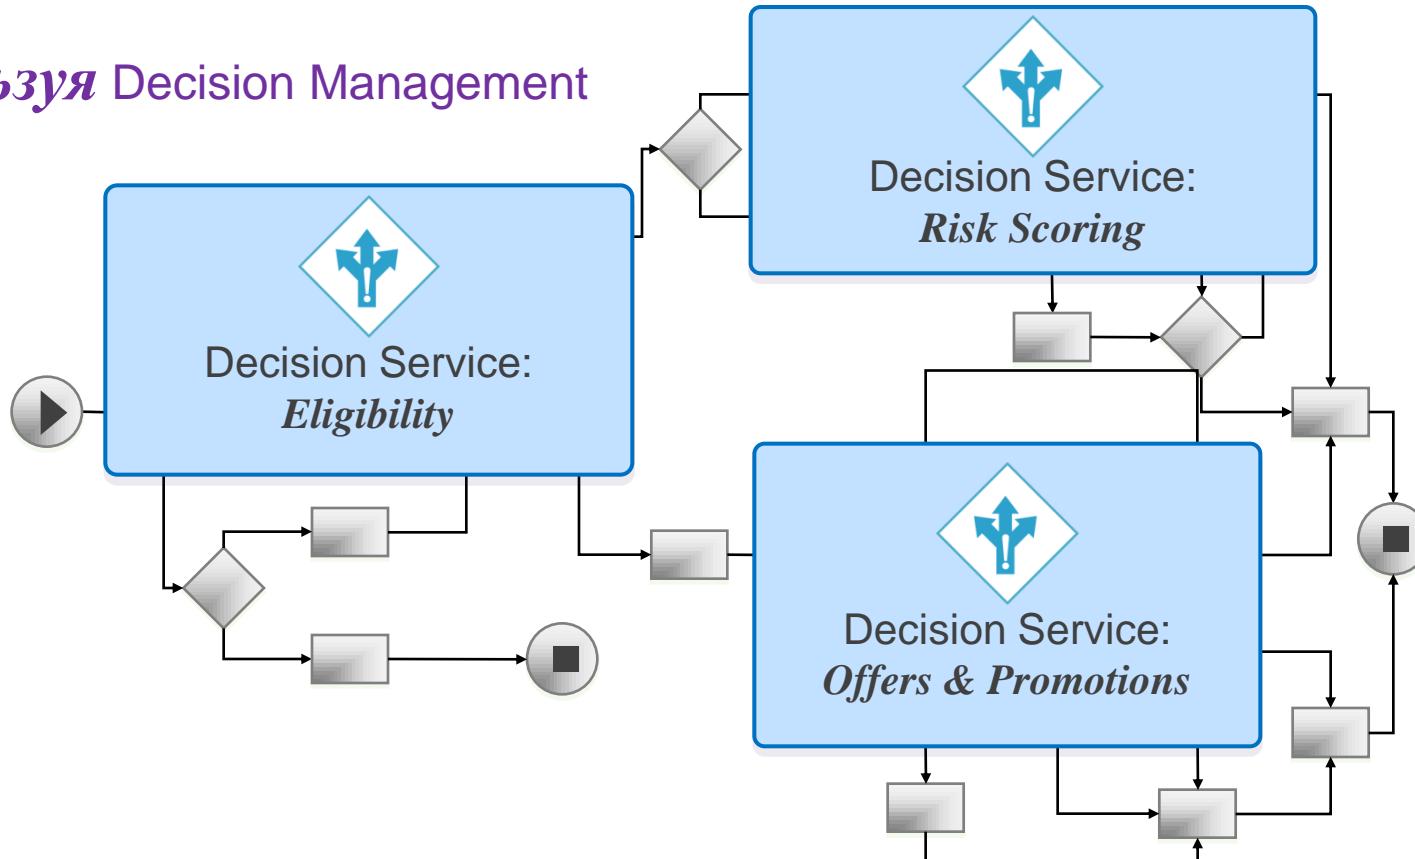

Без Decision Management

- Решения зафиксированы в процессах или приложениях
- Требуется знание программирования для создания или модификации логики принятия решения
- Скорость изменения бизнес-решений ограничены загруженностью ИТ-департамента

Используя Decision Management

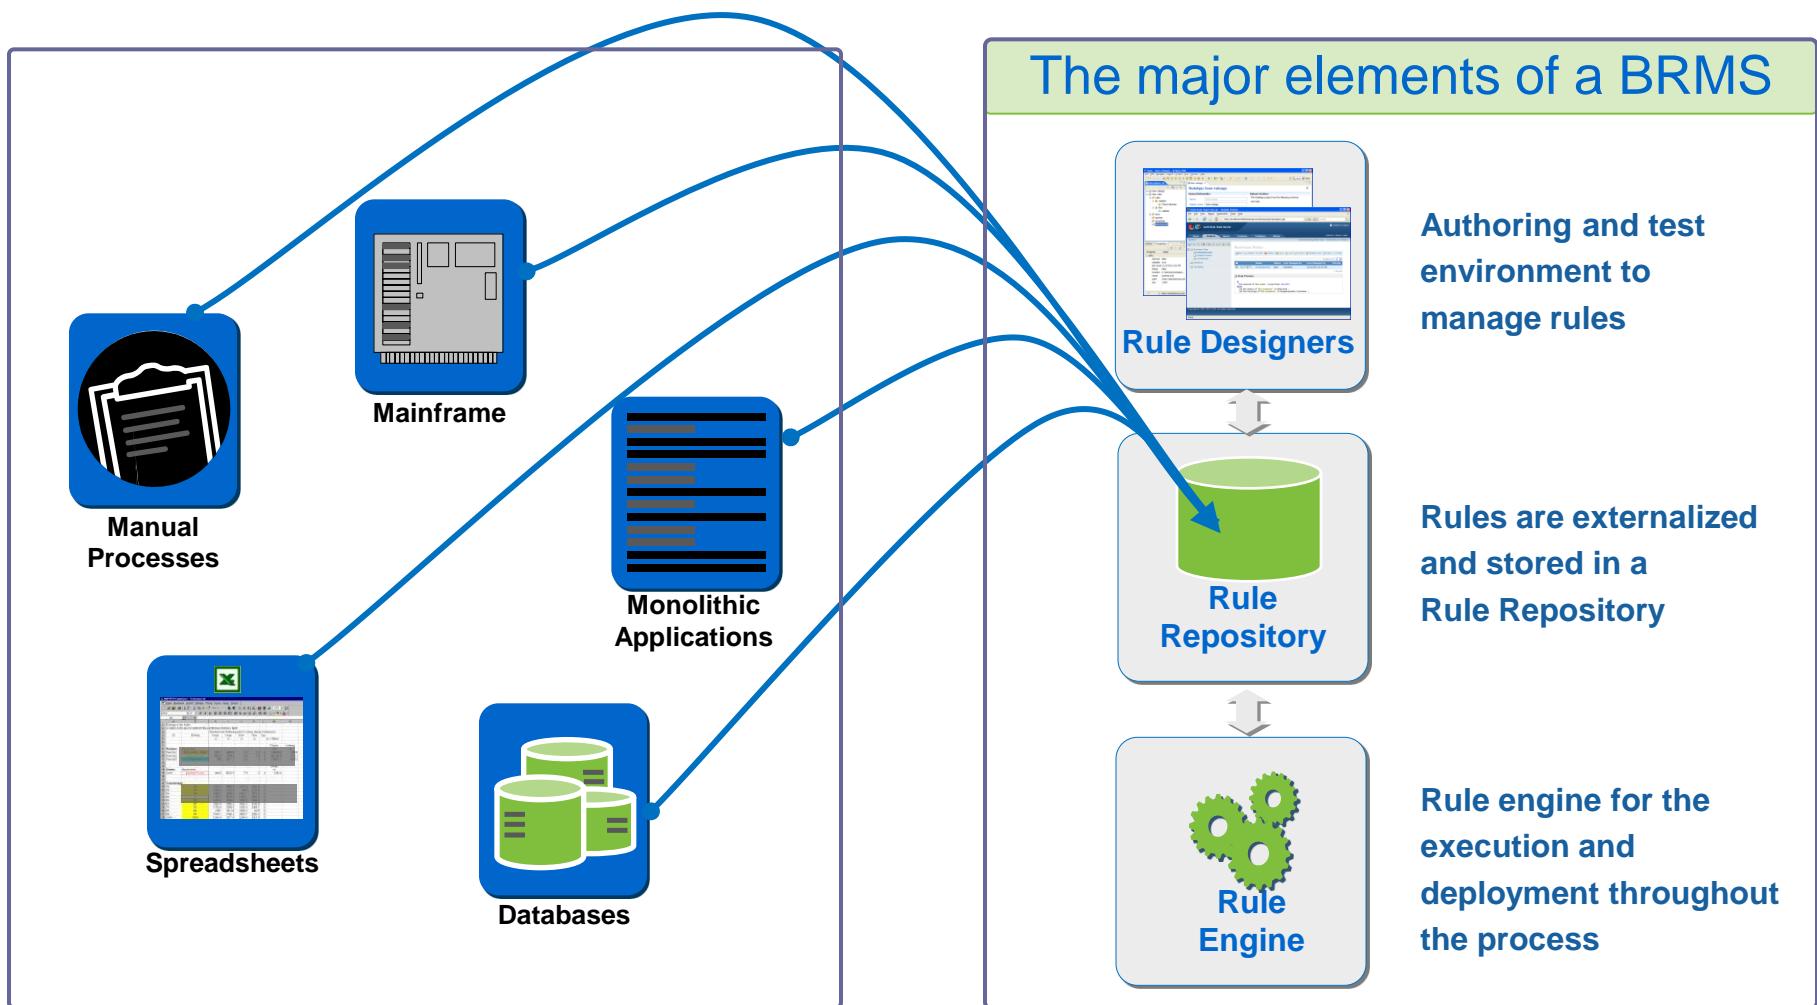

- Переиспользование в любых процессах
- Разрешает бизнес-пользователям быть авторами и изменять решения в любой момент
- Быстрая реакция на внешние изменения
- Максимальная автоматизация

Где прописывать правила?

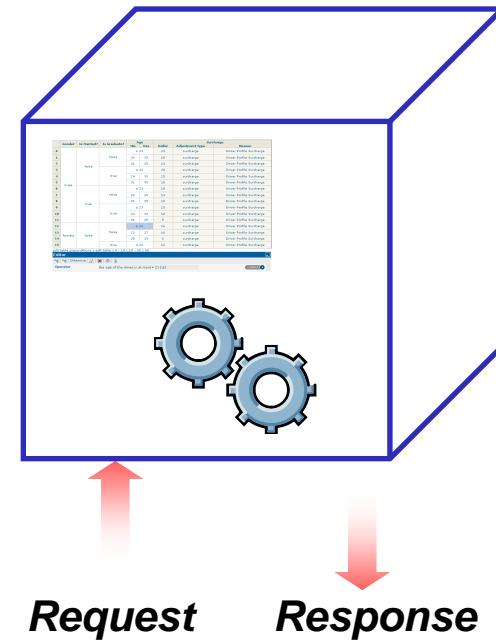

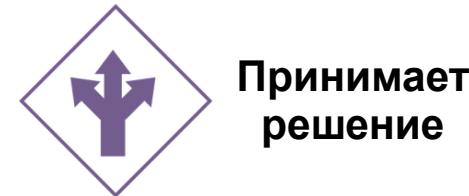

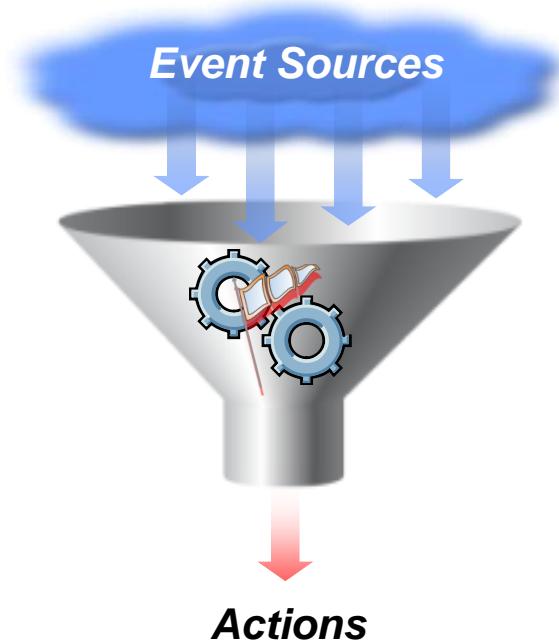

| | В приложении | В специализированной системе |
|---------------------------------|---|---|
| |  <pre> graph LR Start((Start)) --> Eligibility{Eligibility} Eligibility --> RiskAssessment{Risk Assessment} Eligibility --> AutomatedPricing{Automated Pricing} RiskAssessment --> Rejection((Rejection)) RiskAssessment --> Notification((Notification)) RiskAssessment --> End(((End))) AutomatedPricing --> Notification AutomatedPricing --> End </pre> | <pre> INITIATIONS set 'name' to the first name of the driver ; if the number of accidents the driver has been involved is more than 2 then set 'high risk driver' to true ; add eligibility error: "The driver (* + name + *) has been involved in too many accidents" </pre> |
| Бизнес-решения принимаются | Человеком | Автоматически |
| Внесение изменений | re-engineering процесса | Изменение правила |
| Цикл изменения | Месяцы | Дни |
| Ответственный за изменения | ИТ | ИТ+бизнес эксперты |
| Распространение правила/решения | Copy/Paste | В общем репозитории |
| Расширяемость | < 50 | Тысячи |

Решения обычно прописываются в разных системах!

Итого. Мы рассмотрели:

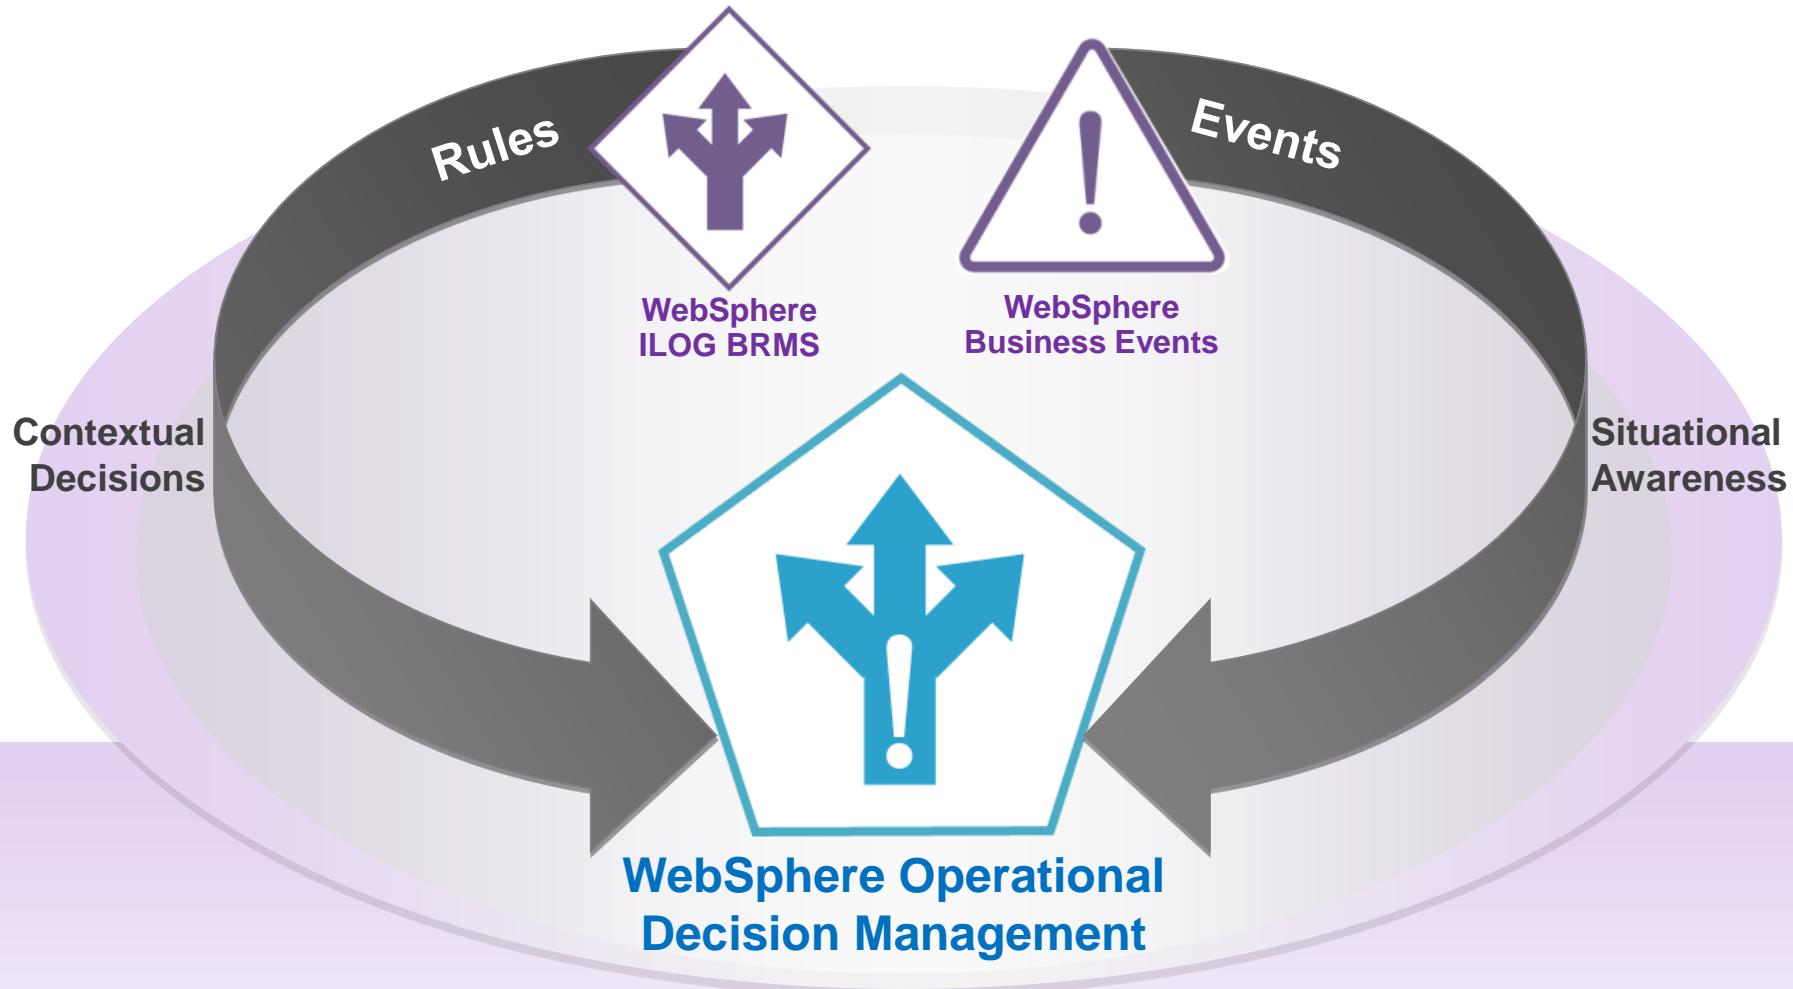

- правила обработки событий и
- правила принятия решений

- Идентифицирует, когда события соответствуют заданному шаблону и вызывает обработчик

- Принимает решения на основе переданных данных

WebSphere Decision Center: A web interface for business users to access and collaborate around decisions updates in a simple, secured and controlled way

Возможность тестирования и симуляции (What-If анализ)

Integrated decision validation services

- Встроенная возможность тестировать наборы правил
- Расчет бизнес-эффективности
- Конфигурация сценариев и кастомизация
- Аудит принятых решений - Decision Warehouse

The screenshot shows the IBM Decision Center interface. The top navigation bar includes 'Decision Center', 'Home', 'Explore', 'Compose', 'Query', 'Analyze', 'Project', 'Configure', 'Options', 'About', 'Print View', 'Help', 'Adam', and 'Sign Out'. A blue header bar indicates the project is 'Pricing'.

The main content area displays a 'Second Test Suite (Test Suite)' report. It includes sections for 'Properties' (Name: Second Test Suite, Folder: /rulePackage, Group: None, Created By: rtsAdmin, Created On: Apr 24, 2009 10:54:44 AM CEST, Last Changed By: rtsAdmin, Last Changed On: Apr 24, 2009 2:00:41 PM CEST) and 'Rules tested' (All rules as of the current project state, Starting Ruleflow Task: Default). A 'Scenarios' section shows a file named 'template1.xls' with a 'Format' of Excel (2003). Below this is a 'Reports' section with a link to 'View all reports'.

A large table titled 'Latest Reports' lists five entries:

| Name | Test Suite Version | Scenarios | Status | Created On | Run By |
|---------------------------------|--------------------|-----------|--------|----------------------------|----------|
| Second Test Suite - Report (10) | 2.1 | 10 | Green | April 24, 2009 2:00:50 PM | rtsAdmin |
| Second Test Suite - Report (9) | 2.0 | 10 | Green | April 24, 2009 1:59:41 PM | rtsAdmin |
| Second Test Suite - Report (8) | 1.13 | 10 | Green | April 24, 2009 11:49:46 AM | rtsAdmin |
| Second Test Suite - Report (7) | 1.13 | 10 | Red | April 24, 2009 11:47:47 AM | rtsAdmin |
| Second Test Suite - Report (6) | 1.11 | 10 | Red | April 24, 2009 11:12:30 AM | rtsAdmin |

Operational Decision Management помогает решать бизнес-задачи

Увеличение доходности

Персонализированные продукты и услуги

Промо-акции и программы лояльности

Расчет комиссий с продаж

Соответствие регламентам

Валидация претензий и обращений

Проверка платежей

Проверка легитимности операций

Глубокий анализ информации для рисков

Страхование и кредитование

Пересечение людей и товаров границы

Мониторинг инфраструктуры

Примеры использования:

Увеличение доходности

- Увеличение доходности на 20% с помощью программ лояльности
- Увеличение коэффициента удержания до 92%
- Сокращение до дней времени создания новых предложений

Персонализированные предложения

BNP Paribas создает предложения клиенту на основе индивидуальных атрибутах - [Подробности здесь!](#)

Промо-акции и программы лояльности

EMT Telecom помогла диллерам создавать best offer для каждого клиента - [Подробности здесь!!](#)

Автоматизация расчета комиссий

Magazine Luiza, крупнейший бразильский ретейлер увеличил продажи, улучшив систему поощрений - [Подробности здесь!](#)

Примеры использования:

Соответствие регламентам

- Время обработки претензий клиентов сократилась в 3 раза
- Поддержка 500 типов транзакций на 36 различных рынках
- Сокращение на 50% времени обработки запросов

Обработка обращений

WorkSafe Victoria ускорило обработку претензий и стало лучше контролировать свои платежи провайдерам - [Смотри видео здесь!](#)

Обработка платежей

Visa Europe упростила контроль над операциями и соответствие регламентам каждой страны - [Смотри видео здесь!](#)

Eligibility Determination

HealthNow автоматизировала процесс обработки запросов - [Подробности здесь!](#)

Примеры использования:

Leverage Information to Manage Risk

- улучшили на 300% эффективность работы персонала с кредитными картами
- автоматически обрабатывается 96% таможенных деклараций
- упростили мониторинг инфраструктурой

Underwriting and Credit

A Large Asian Bank автоматизировал оценку риска при выдаче кредитных карт - [Подробности здесь!](#)

Таможенный контроль

Swiss Customs автоматизировала расчет таможенных тарифов - [Подробности здесь!](#)

Мониторинг инфраструктуры

Case Western Reserve University создал систему мониторинга реального времени мостов - [Listen](#)

Основные требования к Decision Management

Как быстро отреагировать на требования рынков, действия конкурентов, требования регуляторов?

→ **Адаптировать** изменения

Как увеличить прозрачность и управляемость бизнес-решениями?

→ **Прозрачность** бизнеса и ИТ

Как мы можем быть уверены, что бизнес-системы взаимодействуют правильно и в правильное время?

→ **Взаимодействовать** строго по регламенту

Overview of WebSphere ILOG in Banking

in customer relationship

***Support bank advisors with contextual recommendations
Products and services eligibility and configuration
Campaign management, segmentation***

in lending

***Scoring
Eligibility
Risk-based pricing***

in payments

***Least-cost routing and fees calculation
Message validation and error processing / auto-repair
Fraud detection and AML***

In dynamic pricing

Differentiated pricing and product catalog

in operations

***Automated accounting for a business transactions
Reconcile data from many sources (e.g.. GL and risk data)
Sales comissioning***

ILOG in Insurance

Underwriting

- Risk, eligibility
- Product selection
- Client segmentation
- Pricing
- Sales commissioning
- SMART CRM

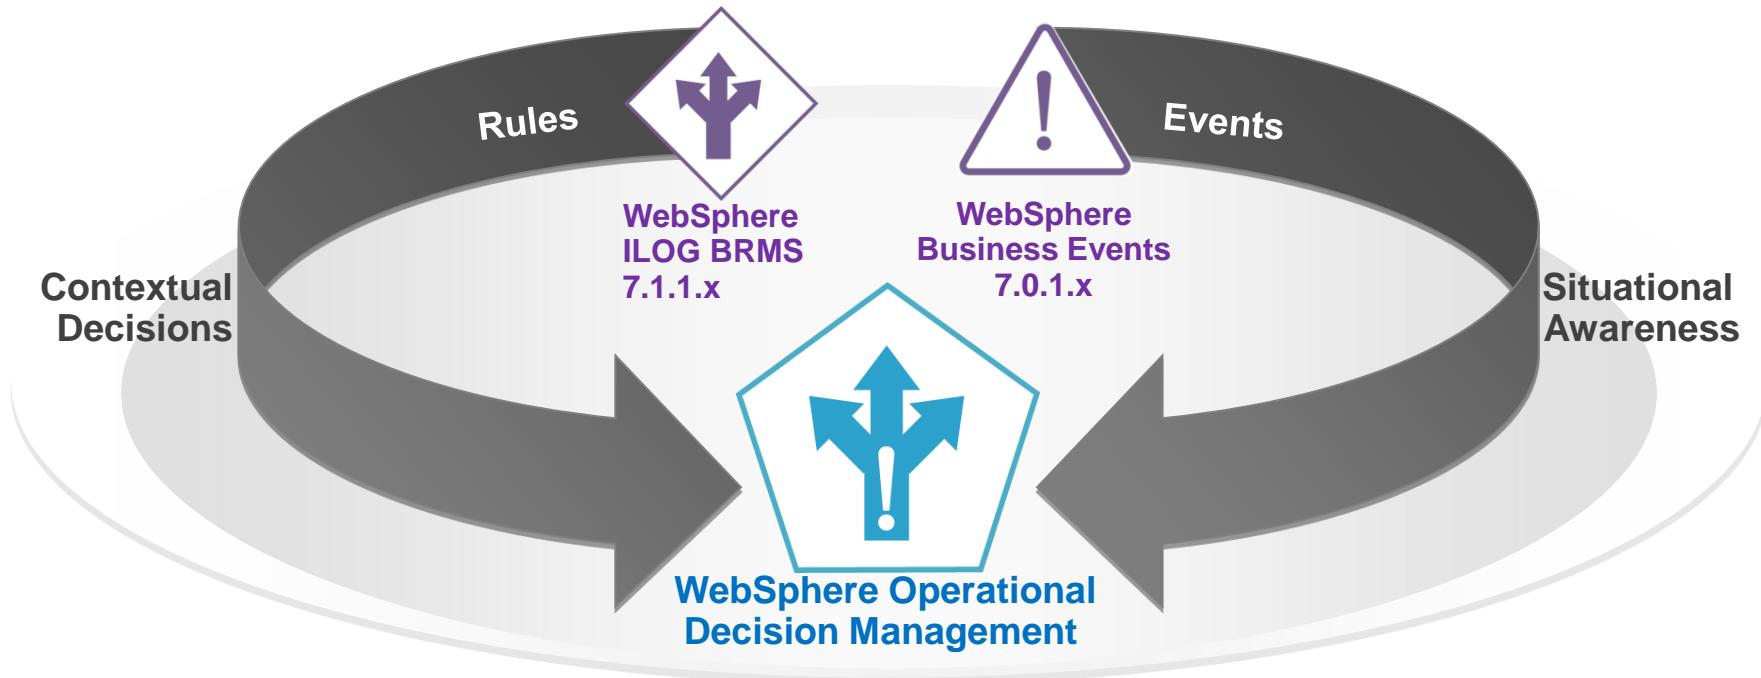

• Claims management

- Validation
- Invoice validation
- Case management
- Adjudication
- Payment
- Fraud detection
- Litigation management

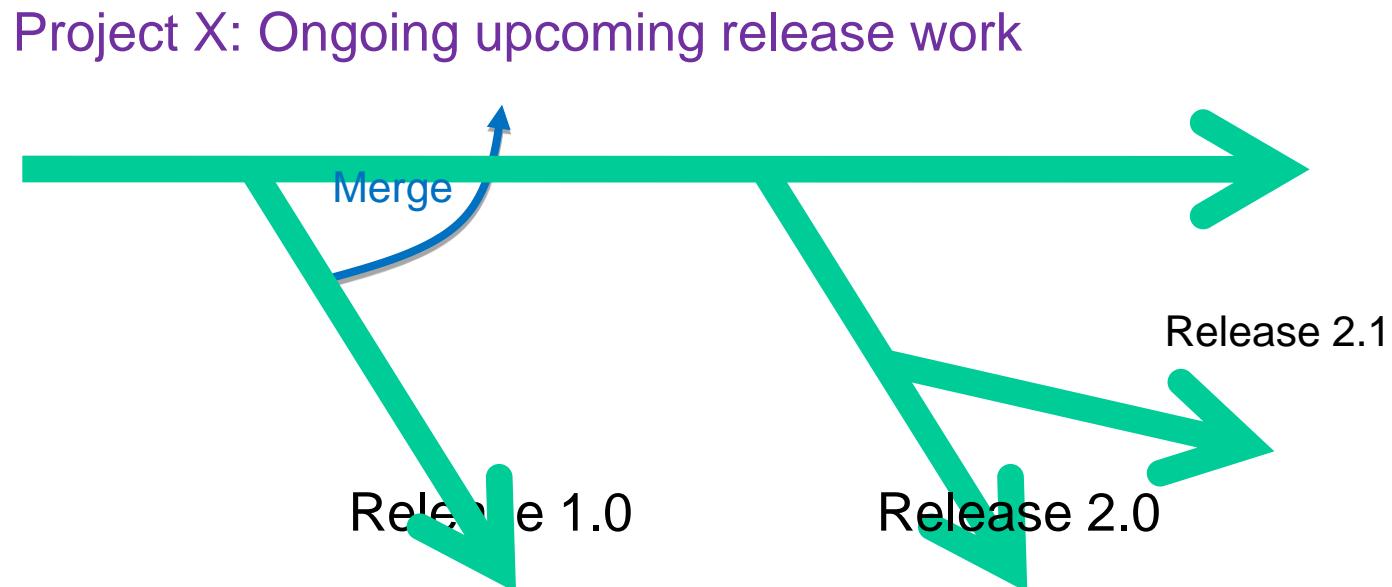

WebSphere Operational Decision Management 7.5

- Automate frequently-changing, repeatable business decisions
- Enable business users to author and update decisions
- Manage rules and events with a single, integrated solution

Effective Decision Governance: Lifecycle Management

- Multiple Release Management
 - Enable business users to make changes to a production rule application without interfering with work they are doing on an upcoming release
 - Merge changes from one release to another as needed

Bank of the West

Savings of US\$1.5 million over 5 years (estimated)

Business challenge:

Manual processes made it difficult for Bank of the West staff to quickly and efficiently process commercial loans. Delays arose as applications were routed through approvals via interoffice mail. If additional information was required, the documents had to be returned to the originating branch and then resubmitted. As a result, approving loans could take up to a week given the process delays.

Solution:

To move from manual, paper-based processes to an efficient, automated paperless system, Bank of the West implemented IBM Enterprise Content Management and Business Process Management along with IBM WebSphere ILOG JRules business rules management system (BRMS). With this integrated ECM, BPM and BRMS system, the bank has automated the loan origination and approval process to accelerate processing times and increase customer satisfaction.

Benefits:

- Reduced approval turnaround from up to a week to less than one day
- Expected savings of about US\$1.5 million over the next five years.
- Improved staff productivity to enable employees to focus on strengthening customer relationships

"IBM software helps us reduce the time to process and approve loans from nearly one week to less than a day. This has been critical in our ability to maintain a competitive edge."

*— Michael Begovich, Senior Vice President, Risk Management,
Bank of the West*

Solution components:

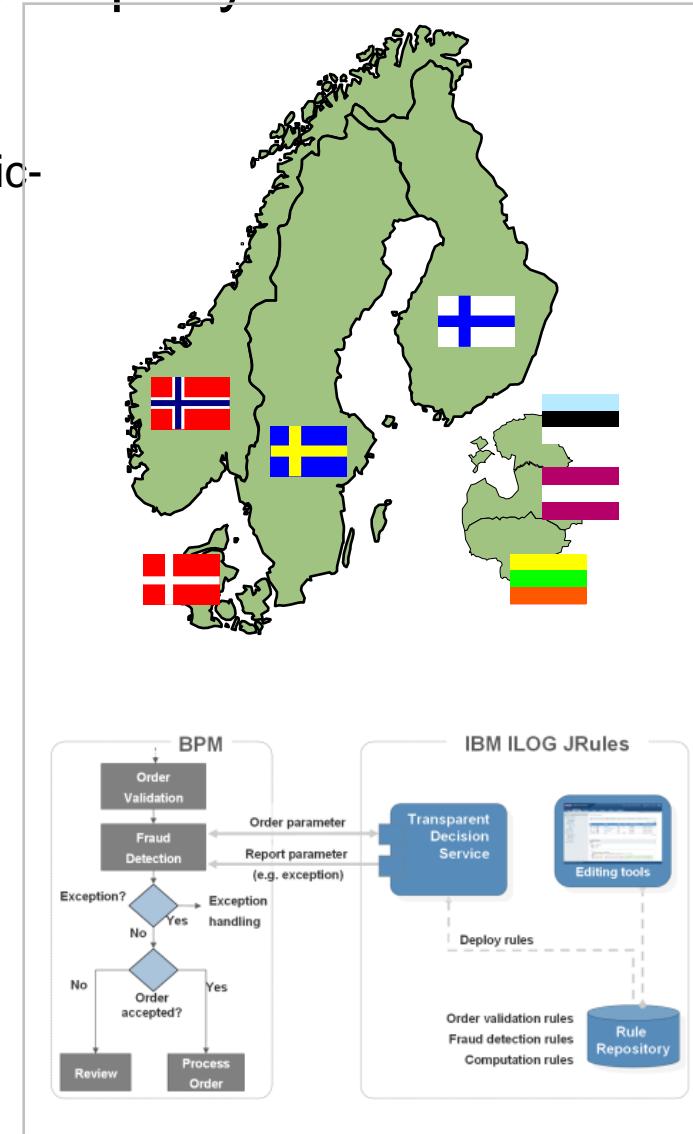

- IBM® FileNet® P8
- IBM FileNet Content Manager
- IBM FileNet Business Process Manager
- IBM FileNet eForms
- IBM WebSphere® ILOG JRules
- IBM WebSphere Application Server

Case Study: European P&C Insurance Company

Using BPM and BRMS Together

- Chose the claims process as the best target for Nordic-level unification and automation
- Combination of WebSphere Process Server and WebSphere ILOG JRules was based on the positive results from a test project in Finland:
 - ✓ Decreased the cost of claims incurred
 - ✓ Increased of customer satisfaction through faster turnaround
 - ✓ Substantial savings of employee work
- Uses of BRMS in this solution:
 - Claims submission validation
 - Decision automation for liability and compensation
 - Payment calculation
 - Straight-through processing determination
 - ***Manage and automate decision variation across countries, processes and systems***
 - ***Accelerate implementation of decision changes***

Castilla y León Social Services Agency

Regional government administers social services with IBM

Business challenge:

Spain's recent passage of a law promoting care and autonomy for dependent people compelled the agency to reengineer its IT systems to comply with new regulations as well as provide better service to citizens.

Solution:

Implementation of a centralized process-oriented management system for granting benefits, automating the agency's work and shortening services delivery. The new system is based on:

- IBM FileNet® Business Process Manager as its business process management (BPM) system, and Micro strategy for statistics and scorecard balancing.
- IBM WebSphere® ILOG JRules® to facilitate the development, deployment and maintenance of the business rules governing the complex decisions to be taken in the process.

The system has allowed the agency to adapt quickly to the new regulatory framework, and provides greater flexibility for implementing future policy changes.

Benefits:

- Better service
- Rapid compliance
- Business user access to rules
 - What-if simulation, history of rules...

- **Industry:** Government
- **Solution:** Social benefits eligibility
- **Deployment country:** Spain
- **Product:**
 - IBM WebSphere® ILOG JRules®
 - IBM FileNet® Business Process Manager
 - IBM FileNet® P8 Platform

Delivering Tangible ROI...
